## Experience

### Front-end Developer | Triluxo Technologies

Aug 2023 – Sept 2023

- Contributed significantly to the development of the travel website, leveraging NextJs, ReactJs, Typescript and Tailwind CSS to create a visually appealing and user-friendly interface with proper industry standards and code reusability.
- Collaborated closely with the development team to integrate APIs seamlessly, ensuring smooth data flow and enhancing the overall functionality of the platform.

## Projects

### CampusConnect | NextJs, ExpressJs, MongoDB, Typescript

[Deployment](#) | [Github](#)

- CampusConnect is a social networking platform designed specifically for college students. It aims to connect students within the same campus and all the profiles and bios like github, linkedin, leetcode are present.
- Features are Login, SignUp and Logout using JWT token & localStorage, Profile Picture upload using Cloudinary and react-image-file-resizer library, Follow and Unfollow a student or remove him from your followers list.
- Search a person based on his username, Colleges are also saved based on student's profile registration, Explore students by searching them through their college, MultiStep Profile Creation with react hook form library.

### EduLab | React.JS, Typescript, Express.JS, MongoDB

[Deployment](#) | [Github](#)

- This platform is like marketplace. You can create courses as well as sell courses. Colleges and Businesses can also register with us to tailor folks inside their institutions with customized courses made for training them
- Features include Login, SignUp, logout using JWT and localStorage, Create your own course, Update it or delete it, Buy a course or Add it to cart, remove courses from Cart.
- Fetch All courses available, courses created by you and your purchased courses, Search courses based on its Title of the course, Dynamic routing is done using react router dom.

### Interview-Tracker | React.JS, Typescript, Express.JS, MongoDB

[Deployment](#) | [Github](#)

- A solution to all the techies and non-techies giving countless interviews and unable to keep a track of them. Search and learn from other interview experiences based on your topic, create your own tracks and have a list of what all you created.
- Features include Login, SignUp, Logout using Jwt token, localStorage, Well Defined user and admin role, Search a interview track, Perform CRUD operations on your Interview Track, Save other's interview experience, Visit a user's profile.
- React toast notifications for better user experience, Creating a Post Form management done using react-hook-form, best practices with proper error handling and route protection and folder structure and reusability principles.

## Education

### Nitte Meenakshi Institute of Technology, Bengaluru

2021 – 2025

Bachelor of Engineering in Information Science and Engineering

CGPA : 8.0

## Achievements

- Secured 1st position in CSS Battle conducted among my CSE branch students.
- Completed HacktoberFest 2022 by making 4 successful contributions.
